## SUMMARY

---

I'm a highly motivated Web Developer with 1.5 years of experience in Web Development . Proficient in ReactJS, Java, and SQL. I have the ability to quickly adapt and deliver results in collaborative team environments.

## EDUCATION

---

**Sai Gon University**

*Bachelor of Software Engineering*

2022 – 2026

*GPA: 2.8 / 4.0*

## TECHNICAL SKILLS

---

- **Languages:** JavaScript, Java, C#, SQL, HTML, CSS
- **Frontend:** ReactJS, Ant Design, TailwindCSS, Vite
- **Backend:** Spring Boot, Django (REST API level)
- **Database:** MySQL
- **Tools:** Git, GitHub, Postman, AWS EC2
- **Soft Skills:** Problem Solving, Teamwork, Communication
- **English:** IELTS 5.5

## PROJECTS

---

**Social Media Website | Team project (3 members)**

2025

- **Role:** Fullstack Developer
- **Technologies:** ReactJS, Java (Spring Boot), MySQL, Bootstrap
- **Architecture:** RESTful API, Client–Server, WebSocket for real-time features
- **Responsibilities:**
  - \* Developed Facebook-like frontend interface using ReactJS with responsive design.
  - \* Built backend APIs using Spring Boot to handle authentication, posts, and user interactions.
  - \* Implemented real-time chat functionality using WebSocket.
  - \* Integrated frontend with REST APIs and MySQL database.

**Spotify Website Clone | Team project (2 members)**

2025

- **Role:** Fullstack Developer
- **Technologies:** ReactJS, Python (Django), MySQL, AWS EC2
- **Architecture:** RESTful API, Client–Server, WebSocket
- **Responsibilities:**
  - \* Developed frontend using ReactJS with reusable components and dynamic routing.
  - \* Implemented backend services using Django REST Framework.
  - \* Designed and integrated MySQL database for music and user data.
  - \* Implemented real-time chat functionality using WebSocket.
  - \* Deployed backend on AWS EC2 to ensure stable and scalable API access.

**Store Website | Team project (5 members)**

2024

- **Role:** Frontend Developer

- **Technologies:** React 19, Vite, Ant Design 5
- **Architecture:** RESTful API, SPA (Single Page Application)
- **Responsibilities:**
  - \* Built modern e-commerce user interface using React 19 and Ant Design 5.
  - \* Used Vite for fast build process with Hot Module Replacement (HMR).
  - \* Implemented responsive layout supporting both desktop and mobile devices.
  - \* Integrated frontend with backend REST APIs.

## Cross-platform Store App | Team project (4 members)

2024

- **Role:** Frontend Developer
- **Technologies:** Uno Platform, C# (.NET)
- **Architecture:** RESTful API, Cross-platform Client Application
- **Responsibilities:**
  - \* Developed cross-platform frontend application using Uno Platform.
  - \* Ensured consistent UI and user experience on Android and Web platforms.
  - \* Collaborated with team members to integrate application with backend APIs.

## SOME OTHERS PROJECT IF YOU'RE INTERESTED

---

### Snake Game | Python Application

- Developed a classic Snake Game using Python, focusing on game logic and user interaction.

### Book Store | Java Application

- Built a book store management application using Java with basic CRUD functionalities.

### Emotion Classification Assistant | Python Application

- Implemented a simple emotion classification assistant using Python and machine learning models.

### Schedule Management Application | Python Application

- Developed a scheduling assistant to manage tasks and reminders efficiently.

### Movie Review Website | .NET, ReactJS

- Developed a website backend using C#(.NET) and MYSQL, frontend using ReactJS
